CAREER OBJECTIVE

Data Analyst and Business Intelligence enthusiast with hands-on experience building ETL pipelines, interactive dashboards, and analytical solutions using Python, SQL, Power BI, and Streamlit. Experienced in transforming large datasets into actionable business insights through data cleaning, visualization, and statistical analysis.

TECHNICAL SKILLS

- **Languages:** Python
- **Data Analytics:** Data Cleaning, EDA, Statistical Analysis, Business Analytics, KPI Reporting, Data Visualization
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Streamlit
- **BI & Tools:** Power BI, MS Word, Excel (Pivot Tables, Power Query, DAX), MySQL, Git, GitHub, VS Code
- **Data Engineering:** ETL Pipelines, Data Transformation, Data Validation, Feature Engineering
- **Machine Learning:** Regression, Classification, Clustering, Model Evaluation
- **Core Skills:** SQL, DSA, OOP, Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst Intern | ***Mar 2026 – June 2026*** ***View***
Unified Mentor Pvt. Ltd.

- Developed Python-based ETL pipelines using Pandas and SQL to clean, transform, and analyze operational datasets, improving data quality and generating actionable insights through EDA and visualization.

Data Analyst Intern | ***Apr 2026 – May 2026*** ***View***
Cognifyz IT Solutions

- Built predictive models and leveraged business intelligence tools to clean datasets and deliver executive-ready visualizations.

ENGINEERING PROJECTS

Nassau Candy Analytics: Profitability Platform Live Dashboard | GitHub Repository

- **Deployment:** Engineered an interactive Streamlit app to transition supply chain logic to a data-driven model.
- **KPI Engineering:** Developed KPI monitoring pipelines tracking Gross Margin %, unit profitability, and business performance trends.
- **Optimization:** Executed Pareto diagnostics and st.map plotting to isolate margin-poor logistics routes.

APL Logistics: Global Supply Chain System Live Dashboard | GitHub Repository

- **Data Pipeline:** Built an ETL data pipeline auditing 180K+ transactions, eliminating 4,400+ anomalies and improving reporting accuracy.
- **Dashboard UI:** Built a multi-page Streamlit app with cascading filters tracking 5 macro markets.
- **SLA Diagnostics:** Developed a *Delay Gap Index* exposing a ~57% uniform delay rate across premium tiers.

Olympics Historical Data Analysis & Dashboard Live Dashboard | GitHub Repository

- **Data Processing:** Performed statistical analysis and data visualization on 100K+ athlete records to uncover long-term performance trends.
- **Dashboard UI:** Built an interactive Streamlit app featuring dynamic medal tallies and country analysis.
- **Trend Insights:** Isolated geographical success maps to uncover long-term country performance patterns.

EDUCATION

Graduation: Goel Institute of Technology & Management | *AKTU* *2023 – 2027*
B.Tech | Computer Science & Engineering (AI & ML) | **CGPA: 8.87 / 10** **Lucknow, India**

Grade 12: Cambridge International Eng Sch Rudrapur, Deoria | (Stream: Science) | Percentage: 76%

Grade 10: Cambridge International Eng Sch Rudrapur, Deoria | Percentage: 79.6%
